

PAGERO BANKGIRO LINK

- safe management and communication of payment files to the Swedish payment market

As a Swedish company on the international market, you need communication channels to Swedish commercial banks and Bankgirocentralen (BGC). Pagero specialize in payments and are the market leaders in Sweden for these products.

SAFE AND SECURE

Bankgiro Link is the most secure and modern transfer method from BGC. Your Internet connection is used for communication. Security is guaranteed by using electronic ID cards and a card reader connected to your computer. The ID card contains details that are matched against the authorizations register held at the bank/Bankgirot. In that way you can be sure that only authorised staff can sign and send payment files. If you require double signatures before transmission, this is also possible.

WITH PAGERO BANKGIRO LINK YOU GET:

- a secure communication method to the Swedish Bankgirot
- a card reader - used with a Bank ID card and is easily connected to your computer's USB port.
- Unlimited access to the Pagero Service Center, by telephone or e-mail, plus access to all software upgrades

ELECTRONIC BANKING SERVICES

Pagero handles all electronic banking services currently on offer on the Swedish market place:

- supplier payments (LB) - including taxes, VAT, salaries and Plusgiro payments)
- Payments abroad via LB (SISU, SPISU, UTLI and Interpay)
- Bank account deposits (KI)
- Bankgiro Receivables
- Autogiro - private and corporate (Direct Debit)
- Payment Services OCR
- e-giro
- Swedbank's outpayment and inpayment system (SUS and SIS)

PRICE

Pagero Bankgiro Link is sold as an annual subscription.
