

PAGERO EXTERNAL PRINT

- send all of your invoices via Pagero

With Pagero's External Print services companies who use Pagero e-invoice can send all of their invoices electronically, regardless if the recipients can or cannot receive e-invoices. The recipients who can receive invoices electronically will receive an e-invoice and those who can not will receive a paper invoice.

THIS IS HOW PAGERO EXTERNAL PRINT WORKS:

Pagero e-invoice has a register of those of your customers that can receive e-invoices. You can administrate the register by yourselves through a smooth web interface.

Your ERP-system does not need information about the customers that can receive e-invoices. You create your invoices as usual.

1. Create invoices as you normally do in your Finance-/ERP-system.
2. Send the invoices with Pagero e-invoice.
3. Pagero will sort out the invoices into two different channels – electronic or external (paper) printing.
4. The electronic invoices are sent directly to the correct receiver in the file format they expect to receive it in.
5. The "print invoices" are sent to one of our external partners who are specialized in paper print (best service with competitive rates). They print, envelope and post the invoice to your customers. If you like you may design the layout yourself including your company logo.

Now you can send all of your invoices electronically via Pagero!

THE INVOICE LAYOUT

Pagero offers two types of invoice layouts. One based on BGC Invoice and one based on Svefaktura. The invoices are sent in black and white.

LOGOTYPE

It is possible to get the company's logotype in black and white.

ENVELOPES

White envelopes with double windows are used. No logotype is printed on the envelope.

CONTACT

For more information or if you like to order, please contact Pagero at; phone 0046 31 730 88 30 or by e-mail; info@pagero.com

Simplify your routines and send all invoices electronically. Those who can not receive e-invoices receive paper invoices instead.

Cost-effective, convenient and easy!
